HARDSUN

We are Hardsun

We are a software development company based in Košice, Slovakia.

Founded in 2013, we now employ over 25 university degree software engineers. We are an experienced team of software development professionals, with services ranging from building software architecture and planning infrastructure down to coding, deployment and maintenance.
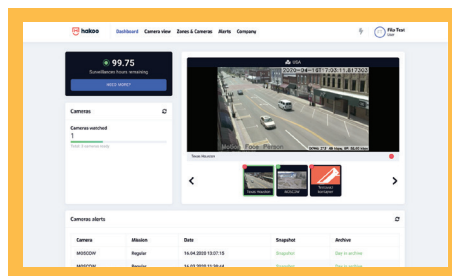

Our clients are based mainly in Central Europe – Czech Republic, Slovakia, Germany, France and Great Britain. The industries we serve allow us to face unique challenges such as Machine Learning, Artifical Intelligence, Computer Vision, Interactive Apps, Complex cloud based and Industry 4.0 solutions.
